Communication with S5/S7-PLC (mainly), whether wired or via WIFI?
Universally armed for all requirements with the WIFI-sets, regardless of whether it is an S7-PLC, S5-PLC or a controller from another manufacturer with a LAN connection, having everything with you, depending on the used set, is your advantage.

 * S5-LAN++ or S5-BRIDGE for S5-PLC
 * S7-LAN or S7-BRIDGE for S7-PLC (PPI/MPI/Profibus)
 * ALF-UA as a pure converter from Ethernet to WIFI
 * Patch-cable or Cross-cable in order to act also wired

 With the WIFI-Set you simply have everything with you in a handy case, be prepared for everything.
This makes (on-site-) work a pleasure.

Data backup S5-PLC on USB-stick via dig. IO

Via digital input triggered DB-backup/-restore without additional PC via PG-socket and Ethernet to USB-stick

| PLC-coupling (data exchange between PLC-devices) |
|---|

Your pumping stations report the water levels of the central control via telephone network. The central office itself can of course transmit commands/messages to the substations as well. Thereto no dedicated line is required, it's sufficient when the stations connect via network (DSL-router).

Data backup S5-PLC on USB-stick via dig. IO

Via digital input triggered DB-backup/-restore without additional PC via PG-socket and Ethernet to USB-stick

Programming/controlling of S5/S7[FREEWARE without support]-PLC's

Program change on your systems and no original programming-package?

   With PG-2000, a universal programming system for S5 and S7 controllers [S7 FREEWARE without support], you can make changes to the controllers yourself. Connect the PC with the appropriate interface-product via the COM-, USB- or LAN-port.

 One surface for S5- and S7-programming [S7 FREEWARE without support] so you don't have to get used to it. Windows as the operating-system, work with every current version of Windows. Where the original programming packages no longer works, work with PG-2000 ONLINE.

Detect and alarm Profinet burglary

Recognize cable breakage, contact problems and line faults.
Retransmissions and failures are logged and reported.
Early acting before total failure of the participant.
