| Remote-maintenance Beckhoff-PLC with firewall |
|---|

Remote-maintenance of a Beckhoff-controller with network-connection via secure VPN-tunnel and scalable firewall
Profinet life cycle monitoring and alarming

Identify impending failures in your Profinet.
Creeping aging will be displayed to you very detailed.
The Profinet-Watchdog give you the change to react before something happens.

Adr. 0   Adr. 1   Adr. 2   LWL-Strecke   Adr. 3

You need for your L1-Bus higher distance like the possible 1200m? You have strong distrubance on your L1-Bus? You need a serial line for higher distances and this galvanic decoupled? No problem, all this points are solved through the LWL-adapter. They are available for artificial and optical fibre, for L1-Bus and RS232.

Move wirelessly around the S7-PLC and communicate for example ONLINE in the status
With the TeleService-device you can connect serial or by USB-cable to your PC/laptop and then communicate directly with the control without a PC-adapter or other S7-programming cables.
 The USB-cable is a standard-cable just as the one you use at your printer.

Universally on/around machine and PLC

Communication with S5/S7-PLC (mainly), whether wired or via WIFI?
 Universally armed for all requirements with the WIFI-sets, regardless of whether it is an S7-PLC, S5-PLC or a controller from another manufacturer with a LAN connection, having everything with you, depending on the used set, is your advantage.

 * S5-LAN++ or S5-BRIDGE for S5-PLC
 * S7-LAN or S7-BRIDGE for S7-PLC (PPI/MPI/Profibus)
 * ALF-UA as a pure converter from Ethernet to WIFI
 * Patch-cable or Cross-cable in order to act also wired

 With the WIFI-Set you simply have everything with you in a handy case, be prepared for everything.
 This makes (on-site-) work a pleasure
