S5-PLC triggered DB-backup/-restore without additional PC via PG-socket and Ethernet on USB-stick

Direct printing from the PLC via dig. I/O

You need production data, circulation lists of your PLC's, but don't want to use a CP or don't get a serial printer anymore? No problem, you need 8 digital outputs and 3 digital inputs of the PLC, and if you connect the PG-Print at it you can generate these lists with a EPSON- or HP-compatible parallel printer.
You have to reach urgend your PLC via remote maintenance and have no TS-adaptor in your company? No problem, configure with the MPI-Kabelmanager your S7-interface-cable MPI/PPI-Kabel the mode "TS" for "remote maintenance", connect this cable with the TS-Adapter (article number 9350-TS) with a standard modem and send it all to your client. Now you will be able to start the connection with your TS-sofware and solve the problem. And this all without buying a original TS-adapter.
Remote-maintenance of a Siemens-S5-controller with S5-LAN++ on PD-port via secure VPN-tunnel of the TeleRouter

Visualize with the latest S7 network panels directly on your MPI Profibus.
No PLC change necessary.
Connect several nodes at the same time via a network module.
Simultaneous access from different systems possible.

Universally on/around machine and PLC

Communication with S5/S7-PLC (mainly), whether wired or via WIFI?
 Universally armed for all requirements with the WIFI-sets, regardless of whether it is an S7-PLC, S5-PLC or a controller from another manufacturer with a LAN connection, having everything with you, depending on the used set, is your advantage.

 * S5-LAN++ or S5-BRIDGE for S5-PLC
 * S7-LAN or S7-BRIDGE for S7-PLC (PPI/MPI/Profibus)
 * ALF-UA as a pure converter from Ethernet to WIFI
 * Patch-cable or Cross-cable in order to act also wired

 With the WIFI-Set you simply have everything with you in a handy case, be prepared for everything.
 This makes (on-site-) work a pleasure
