Please make sure to update your drivers before using our products.

## Universal network-administration

You need to remote maintenance multiple networks simultaneously and your existing switch / router does not have that many ports? No problem, with the TELE-Router you are able to assign up to 3 IP addresses to each LAN / WAN port, so you can communicate with the various segments and networks.

## Remote-maintenance Pilz-PLC with firewall

Remote-maintenance of a Pilz-controller with network-connection via secure VPN-tunnel and scalable firewall

## Remote maintenance / telecontrol of PLC

The access to the connected PLC with the Siemens TS-software or PG-2000 including TS-option results of coupling via Analogue-, ISDN- (only with AB-adapter) as well as GSM-line.

## Data backup S7-PLC over MPI/Profibus on FTP-server

S7-PLC triggered DB-backup/-restore without additional PC via MPI/Profibus on FTP-server

## Data backup S5-PLC on FTP-server via dig. IO

Via digital input triggered DB-backup/-restore without additional PC via PG-socket and Ethernet to FTP-server

## Worldwide remote-access thanks to our own cloud

Worldwide remote-maintenance without additional costs thanks to our own cloud

Your devices connect to your own cloud, no matter where they are in the world. Only your devices are in your own private cloud, no one else has access to the cloud. In addition, you can provide each device with its own connection-password, so that the individual systems are protected despite the private cloud.

No registration on any portals, no hidden additional costs, your devices in your own cloud are always accessible.

This is how remote maintenance/remote access is fun.
