### Detect and alarm Profinet burglary

Detection and logging of unauthorized access in the defined Profinet

Attempted break-ins and access to the network are recognized immediately and e.g. reported by email

Logging of all accesses in the network for historical processing

Possible data-storage USB-stick or FTP-server via USB-network-stick.

### Data backup S7-PLC over MPI/Profibus on USB-stick

S7-PLC triggered DB-backup/-restore without additional PC via MPI/Profibus on USB-stick

# Watching of S5- PLC's with panel for S7-PLC

Your panel only has a LAN-socket as PLC-interface and supports only S7-RFC1006, no problem. Connect this socket with the S5-LAN++ and plug it directly on the PD-interface of the PLC. The S5-LAN++ performs adverse your panel as a S7-PLC although you receive the data from the S5-PLC. Then access to the variables and data of the S5-PLC is already available.

#### Remote-maintenance Siemens-S7-PLC with PN-Port

Remote-maintenance of a Siemens-controller with network-connection via secure VPN-tunnel of the TeleRouter

### Log messages via e-mail

You want to be informed of access violations and range errors in the communication with your controls? No problem, with the S7-firewall you can be informed about each of these attacks / injuries by email to determine each polluter.

# Profinet life cycle monitoring

Identify impending failures in your Profinet.

Creeping aging will be displayed to you very detailed.

The Profinet-Watchdog give you the change to react before something happens.
