# Data backup S5-PLC on USB-stick

S5-PLC triggered DB-backup/-restore without additional PC via PG-socket and Ethernet on USB-stick

# Data backup S7-PLC PN-port on SD-card

S7-PLC triggered DB-backup/-restore without additional PC via PN-port on SD card

## Data backup S7-PLC over MPI/Profibus on USB-stick via dig. IO

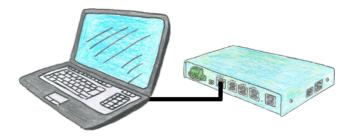

Via digital input triggered DB-backup/-restore without additional PC via MPI/Profibus to USB-stick

### Set time in PLC controls

Do you need the exact time in the system/control, for example for production-documentation? Or summer/winter-time changeover, everyone is still familiar with this catchphrase. Always in March and October the problem of the time-change on the PLCs of your system(s). S5/S7-TimeServer receives the time via GPS-data and then sets this directly in the S7-controllers (where possible) or in all controllers in a defined data-block. In this way, these controllers can get the time/date from it and process it. At the same time, S5/S7-TimeServer can also work as an NTP-server in your network.

# Integrated WebServer

You would like to use a device that is small and handy and reasonably parameterizable yet? No problem, with the TELE-Router you fulfill all these requirements. The device is parameterizable via an integrated web server, connections self-explanatory.

## Data backup S5-PLC on USB-stick via dig. IO

Via digital input triggered DB-backup/-restore without additional PC via PG-socket and Ethernet to USB-stick
