Data backup S5-PLC on SD-card

S5-PLC triggered DB-backup/-restore without additional PC via PG-socket and Ethernet on SD-card

Standalone recording

With the integrated SD-card-slot you back-up the recorded data in the device and dont need an external memory. Nevertheless you can send additional the data via FTP to a FTP-server.
Coupling of 2 devices with different hardware-interfaces?

    Devices of the UNI-COM-series offer the implementation of different hardware-interfaces with simultaneous galvanic-separation of both sides up to 1000V. Connections to the device via screw-terminals or via the integrated D-Sub with screw-locking. Universally usable for every application.

 Only a 24V DC supply is required for the converter.

Direct-mode „extended serial interface"

There is an unsupported control or data logger or converter integrated in your installation which protocol is not supported? No problem, the signs that the PC in the office sends will be transferred via telephone line by the Direct-mode , and on-site reproduced by the TP/TB. The way back is identical. So in that case there's also a communication to the electronic devices available.

Remote-maintenance of a Siemens-S7-controller with S7-LAN on MPI/Profibus over separate VPN-server

Remote-maintenance of a Siemens-S5-controller with S5-LAN++ on PD-port over separate VPN-server
