Wireless around the Mitsubishi-PLC

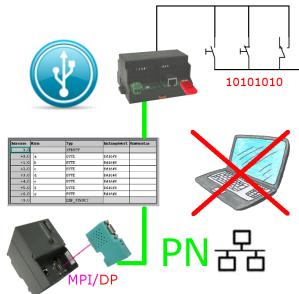

Move wirelessly around the Mitsubishi-PLC and communicate for example ONLINE in the status

Remote maintenance / telecontrol of PLC-devices

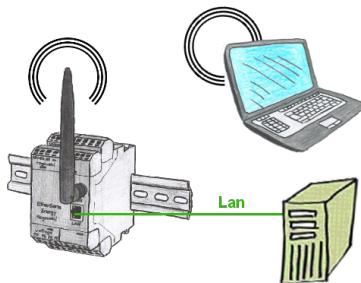

Access to the connected PLC takes place by coupling via Analogue-, ISDN- (only with AB-adapter) and GSM-(only with external GSM-modem)-line.

Data backup S7-PLC over MPI/Profibus on USB-stick via dig. IO

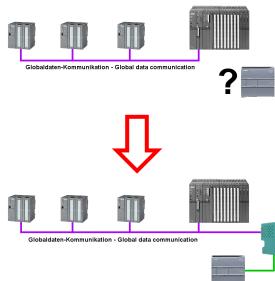

Via digital input triggered DB-backup/-restore without additional PC via MPI/Profibus to USB-stick

Parallel access LAN/WiFi

Access parallel via LAN and WiFi to the EtherSens-device. Therefor create via the web-server for each way an ip-address, regardless whether its the same subnet or not.

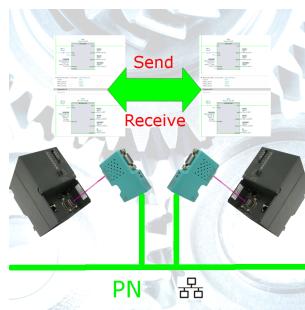

Global data communication (MPI) also with network-PLC

Running global-data-communication between MPI-PLCs (S7-300/400), is one of these PLCs replaced with a newer PLC with network-interface (S7-1200/1500), this PLC was not able to access this data.

Simply configure the global-data of the “old” PLC via the web-server in the S7-LAN-module. Enter the new PLC as a TCPIP-connection-partner and the module writes/reads the data via PUT/GET from this network-PLC and passes it on as before.

S7-300/400 (MPI/DP) to S7-300/400 (MPI/DP)

Coupling S7-controller with MPI/Profibus at S7-controller with MPI/Profibus via network
