

Short instruction/handling Ethernet over USB

The "Ethernet over USB"-adapter serves as an extension with an additional Ethernet-port.

It can be used for these devices :

- TINA
- TINA-II
- ProfiNet - WATCHDOG
- CONNECT (not for LTE-version)
- CONNECT-II

The adapter is plugged into the USB type A socket of the device. As soon as the adapter has been recognized by the device and a LAN cable is connected, the two integrated LEDs start to light up:

Green Link-status

Yellow Data communication (flashes depending on data)

You can now access by the device-specific default IP-address 192.168.0.1.

Under the web-address <https://www.process-informatik.de> are product specific documentations or software-driver/-tools available to download.
If you have questions or suggestions about the product, please don't hesitate to contact us.

Please make sure to update your drivers before using our products.

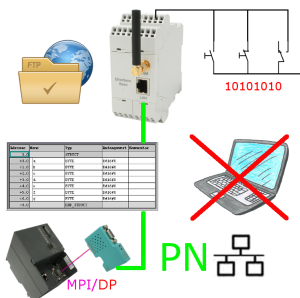

Remote-maintenance access independent of hardware

Why always take any additional hardware in the luggage for remote-access to your own systems and machines? Installing the Software-CONNECT on your PC you always have with it and access to your own CONNECT-cloud is always possible, no matter where you are.

Internet-access on the PC of course required.

Data backup S7-PLC over MPI/Profibus on FTP-server via dig. IO

Via digital input triggered DB-backup/-restore without additional PC via MPI/Profibus to FTP-server

S7-300/400 (MPI/DP) to S7-300/400 (MPI/DP)

Coupling S7-controller with MPI/Profibus at S7-controller with MPI/Profibus via network

Data backup S7-PLC over MPI/Profibus on USB-stick via dig. IO

Via digital input triggered DB-backup/-restore without additional PC via MPI/Profibus to USB-stick
