Step5/7-Programming system
PG-2000

Installation note:

Load your license file using the link given in your personal license email.
The password for extraction can also be found in this email. Then copy this
file into the folder of the installed PG-2000 software (demo version).
After restarting the software, your license is active.

Under the web-address https://www.process-informatik.de are product specific
documentations or software-driver/-tools available to download.
If you have questions or suggestions about the product, please don't hesitate to contact us.

Please make sure to update your drivers before using our products.

You also need to network devices but dont have locally no ethernet-cable. Wifi is available? With the EtherSens-Bridge you bring immediately all connected wired participants in the WLAN network.
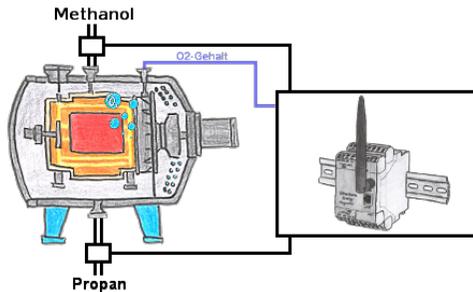

You want to protect your system against unauthorized access and changes? No problem, with the S7-firewall you secure your system against unauthorized access and thus prevent deduction or alteration of your system and process data.

Coupling S7-controller with MPI/Profibus at S5-control with PD-port via network

Data backup S5-PLC on FTP-Server

S5-PLC triggered DB-backup/-restore without additional PC via PG-socket and Ethernet on FTP-server

Remote-maintenance of a Siemens-S5-controller with S5-LAN++ on PD-port via secure VPN-tunnel of the TeleRouter

Take over control-tasks

Capture with the Ethersens-device not only your process-values, you would be able to do control-tasks with the device.
